

Memscm Technology Sdn. Bhd.

Range of Capabilities

Category Range of Capabilities

Description

We're focussing on thin gauge high precision stamping ranging from 0.05mm ~ 1.00mm thickness. We have long experience in stamping thin gauge components for semiconductor industries where others fail. We provide diverse, cost effective solution to our customers. This includes thin gauge stamping of cold rolled steel, pre-tinned coated steel, stainless steel, aluminum, beryllium, brass, phosphor bronze, copper and more!

Tape and Reel Packaging

CategoryTape and Reel Packaging

Description

MEMScom committed to provide 100% solution to your mechanical needs. We have developed fully automated assembly machines equipped with dual high resolution vision system to detect quality issues. This will give guarantee and peace of mind to our customers their parts are free from defects.

No hand involved in the packaging process – all done automatically.

Assembly Services

CategoryAssembly Services

Description

MEMScom is one stop center for mechanical component. Our secondary services encompass from insulation assembly, adhesive, welding and liquid insulator assembly.

You share your problem, we provide the solution.

Stamping Process

CategoryStamping Process

Description

A great tool is essential to yield good product. MEMScom is considered one of the premier precision metal stamping company specializes in the stamping of tight tolerance, high precision and thin gauge metal components.

We maintain a robust tooling capability to assure all our progressive stamping tools exceed customer requirements. We're one of very few

company guarantee our tooling for entire program life.

Prototyping

Category.....Prototyping

Description

MEMScom has a full range of in-house prototyping capabilities. We strongly believe getting first concept to reality in timely manner is crucial in development phase. We offer 5 days lead time for prototype complete from design until final product with/without plating and packed in tape and reel with production tolerances. Fast does not mean expensive, we know how to make it happen.

Innovation

Category.....Innovation

Description

R&D Team continuously working to explore new product and processes. We offer our customers innovative solutions from design, manufacturability, material selection, various cost effective plating solutions, value engineering and fully customized automation packaging.

Just provide your concept, we will show you the product. We're committed in Bridging Technology with our customers.
